 - An enthusiastic, organized, detail-oriented and self-motivated individual who is disciplined, with a logical and pragmatic approach, strong mathematical background

RELEVANT PROJECT WORK

Tindog: I have created this website while practicing my Full Stack Developer Course at Udemy. This website is responsive, and it helps to find pets. It also includes different Pricing options and testimonials as well. I have used Carousels, cards, Bootstrap, HTML, CSS and JavaScript for creating this website.

Capstone Project "PassVault": PassVault is a password manager that securely stores your passwords and personal information in a secure vault. PassVault will auto fill your login credentials as you visit apps and sites. You have to create and remember a PassVault master password, and PassVault will autofill logins for you. PassVault remembers your passwords for you and keep you from away from struggling with frustrating password resets. I have used HTML5, CSS, JavaScript, REACT, Node.js, Express, MongoDB etc.

Online Movie Booking: -

Technologies: Front-End (ASP.NET MVC) and Back-End (SQL SERVER)

This project has two modules like user and admin for adding the movies in tables and viewing the details of movies. Both user and admin can login with their login credentials saved in tables. I used the SQL Server to create the tables and to store the data of movies.

Please see my GitHub account for more projects.....

EDUCATION

Full Stack Certification

Sept. 2022 – Dec.2022

Udemy Boot Camp
Enterprise Software Development Program, Postgraduate.
Humber College, Toronto, ON
Master of Computer Science
Punjab Technical University, India
Bachelor of Computer Science
Punjab University, India

May 2019

April 2014

April 2011
